Profile

I am an ambitious and **motivated** person. Being a software developer is what makes me happy. Over the years I have always cultivated many **interests** and will continue to do so, I like reading and learning new things that I have never done before. The feeling of learning a new **skill** is priceless. I wish I could have the opportunity to **improve** every day, even a little, but have the opportunity to grow. I had experiences **abroad**, I lived in other Italian cities, I was an **Erasmus** student, I understood the value that people have and how much sharing can give us. **Sharing** is the key to growing and living better.

I am eager to learn new things and to espouse new methods. Good **communicator**, I am an easy person to relate to, able to work on my own initiative, both autonomous and as part of a team.

Education

2019-present *Apple Developer Academy - Italy*

- Apple Developer Diploma

Work Experience

Developer from 10/2019 - present

Apple Developer Academy (Naples)

In this path I learned the application design processes, I actively participated in the realization of projects supporting the development of UI / UX, business model, front-end development.

University Internship from 03/2014 to 10/2016

Rome (Policlinico Umberto I)

In the three years I carried out more than 1800 hours of Internship applying the various methods and radiographic techniques learned in different hospital departments.

Hobby

Passionate about technology and music. I read a lot and a bit of everything, paying particular attention to web marketing and the evolution of the blockchain world. I play guitar, drums and I love percussion in general.
